

Professor M Snowling
Principal
St John's College
St Giles
Oxford OX1 3JP

Dear Professor Snowling,

I am writing to you as a mother who has children that attend Barford St Peter's Primary school. I am so very concerned about the life threatening health complications that can occur from breathing in the dust from a quarry. The quarry is so close to the school and the prevailing winds will carry the dust (which is so small you are unable to see it) directly towards the school. The children are encouraged to spend as much time outside as they can and they will be constantly breathing this dust whilst they are there. The school is also next to the lovely park that we have, where children of all ages and various villages and towns, come to play.

I know you have the power to stop this land being used for a quarry and I beg you to use this power and either keep the land for farming, as it currently is, or if money is that important, change it to something that does not endanger the future health of my children.

I beg you to stop this quarry going ahead.

Kindest regards,
